

Wholesale Cost in OfficeMate

There are two places for wholesale cost in OfficeMate Product Setup. Typically, the Wholesale Cost is the normal wholesale cost found on the Frames Data Disk. The Base Cost is typically what the practice actually paid for the frame. By contrast, the Base Fee is the retail amount charged to patients.

When loading frames from the Frames Data Disk, both the Wholesale Cost and Base Cost fields are automatically populated. The Base Cost field may be changed manually in the Product Setup area or through the Product Maintenance area (for changing multiple items at once). If you are using the VSP Interface in OfficeMate, it is very important that the Wholesale Cost field be populated.

The screenshot shows the 'Products : Frames - Superpipe' window in OfficeMate. The 'Product Details' tab is active. The 'Wholesale Cost' field is circled in red and contains the value '\$49.95'. Other fields include Product Name (Superpipe), Ins. Fee Type, Unit of Measure (Each), Vendor (Marchon), and Frame Usage (Metal). The 'Insurance Groups' table is empty. The 'Patient Fees' table is also empty. The 'HCFA - 1500 Additional Information' section shows Place of Service (Office), EPSDT (), and EMG (). The 'Financial Group' is 'Ophthalmic Materials Sales' and the 'Production Group' is 'Core Frames Fees'. The 'Commission Class' is 'Not Assigned'.

Carrier	Plan	Group

Patient Fee Type	Fee

Medicare Allowable Fee	\$0.00
Wholesale Cost	\$49.95
