

## WaveRFID - IDA Product Installation Guide

### Setting up the Connection

- After you have signed up with Frames Data, login to WaveRFID and click on "Admin"

Admin

- Click on the "Frames Data Settings" button

- Enter your Frames Data username, shipping and billing zip codes, and number of locations; then click the "Save" button.

**Settings** 

Username \*  

Shipping zipcode \*  

Business zipcode \*  

Locations \*  

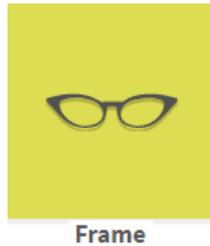

**Subscription Status:** Not Applicable

 **Save**

- If you don't know your Frames Data Username, you can reach out to Frames Data Technical Support at 1-800-821-6069 Ext. 1, or by email at techsupport@framesdata.com.
- Once you save, your "Subscription Status" will update to "Active". You can now start using the Frames Data interface.

## Importing from Frames Data

- Go back to the dashboard and click on the “Frame” button

- Click on the “Import/View Frames Data” link

- You will be able to search for frames via an assortment of different options and import them into your WaveRFID software.
- If you experience any issues during this process, or if following these steps does not lead to the result above, please contact WaveRFID via email: [help@waverfid.net](mailto:help@waverfid.net)

## Syncing with Frames Data

- All syncing of data between your WaveRFID software and Frames Data is done periodically in the background during non-business hours. There are no steps required by you to keep your Wave RFID software updated with the most current information from Frames Data.
